I've created some graphic art projects and was wondering if they could be sent to a service to have them printed? Is there any way I can save a WD Premium file as a PDF? Thank you

I would think so, then I just looked. Nope. Not even a plain vanilla PDF. 😞

Your best choice, and it is not much of a choice, is JPEG and change the resolution to 300dpi. Or if the service provider supports it, maybe Photoshop PSD.

Re: Save as PDF

If printing is available, you may have success with printing to a pdf print driver. You would need to set the paper size in the print driver.

Re: Save as PDF

Thank you. That wasn't the answer I was hoping for, but it is what it is. As a work-around, I previewed the file in my browser [Chrome] then I clicked on the browser's print option and set the destination to "Save as PDF" which worked, but I'm not sure of how the margins will affect the printing. I will also need to set the page size to the px of a standard size paper. [8 1/2 x 11 inch]
