

On the following pages I have listed some bugs, problems and requests to optimize the program.
I have sent these several times to the German support and never received a ticket number or message.
So again the attempt on the TG-forum.

There are several bugs/problems in the combination of „Text inside“ and paragraph background color and text background color. These are shown on the next 6 pages.

Wishlist:

1. The skew angle of horizontally and vertically skewed objects should be displayed and changeable in the info bar.
It's now only horizontally displayed and will reset to 0 after a change. If I set it to 22° it should show 22°.
2. I want to change/display the size of rounded corners (rectangle, quickshape) in units (changed in any unit and displayed in current unit).
3. I want to insert the "number of pages" to set up a pagecounter like "Side 1 from 10".
4. Multiobject tools like "Multi-rotation-tool" and "Multi-scale-tool". Every object would be separately changed in one go.
5. Relocate-tool (copy the selected object horizontally and vertically like a labels sheet).
6. Standard vector-fill (like the Hatch-Pro-Tool from ArtWorks).

For the PDF export, only the paragraph background color is exported.

See PDF-file „Dear Xara“.

For the PDF export, it is all fine.

See PDF-file „Dear Xara“.

- First paragraph „Paragraph background color“
- Second paragraph „Text background color left-aligned“
- Third paragraph „Text background color justified“
- Fourth paragraph „Text background color right-aligned“
- Fifth paragraph „Text background color full justified“

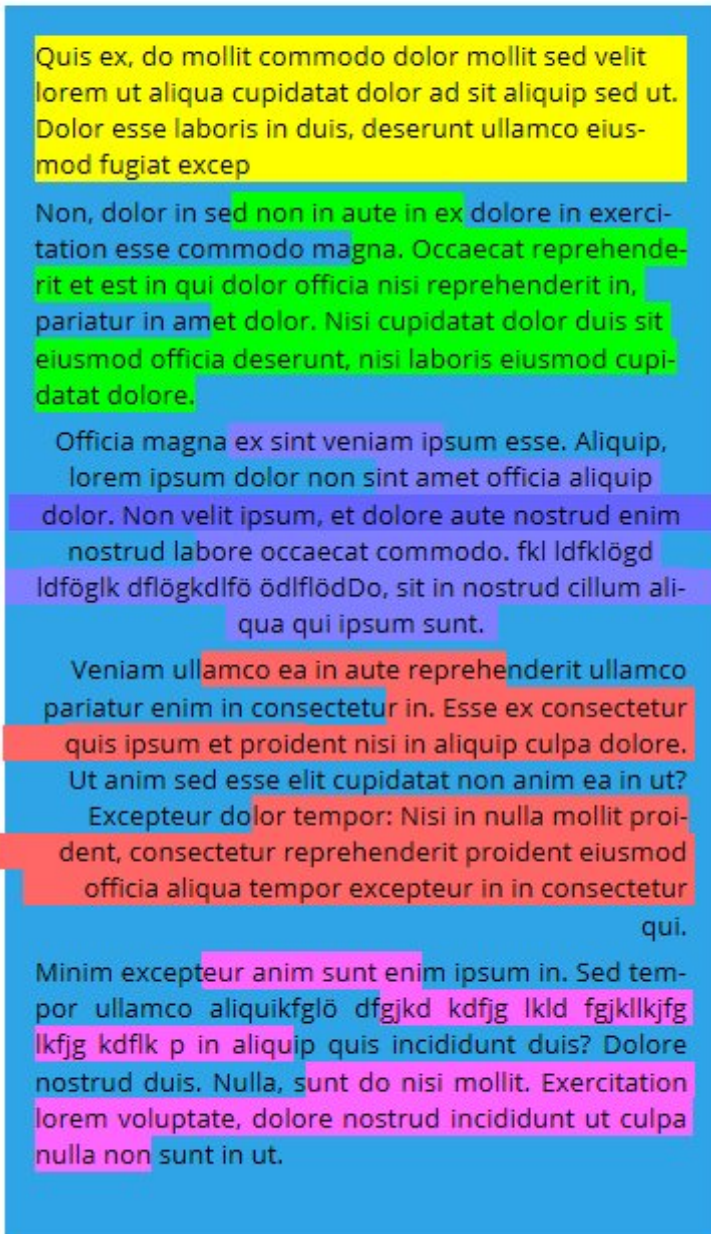

The paragraph and text background colors are displayed.

Wherever staining goes beyond the left or right bounds of text, the limitation of staining is destroyed.

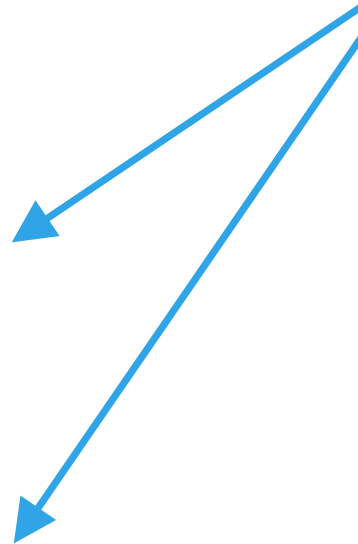

(exception: left-aligned and justified text).

- First paragraph „Paragraph background color“
- Second paragraph „Text background color left-aligned“
- Third paragraph „Text background color justified“
- Fourth paragraph „Text background color right-aligned“
- Fifth paragraph „Text background color full justified“

The paragraph and text background colors are displayed.

With justified and right-aligned text, the coloring is destroyed wherever it goes beyond the left or right text boundary.

- First paragraph „Paragraph background color“
- Second paragraph „Text background color left-aligned“
- Third paragraph „Text background color justified“
- Fourth paragraph „Text background color right-aligned“
- Fifth paragraph „Text background color full justified“

The paragraph and text background colors are displayed.

In the fifth paragraph the text alignment is broken if the background text color is beyond the left or right edge.

- First paragraph „Paragraph background color“
- Second paragraph „Text background color left-aligned“
- Third paragraph „Text background color justified“
- Fourth paragraph „Text background color right-aligned“
- Fifth paragraph „Text background color full justified“
